

# LEROY GREENE PROPOSAL

## DESCRIPTION

I am pleased to submit this proposal for services to support the Leroy Greene Academy in achieving its goal to create an interdisciplinary school with high achieving pathways in the arts and entrepreneurship. I support their vision to provide quality innovation education by creating interdisciplinary skills and implementing innovation frameworks. The following proposal is to assist in creating and improving the program and curriculum as well as supporting and training staff and partners.

## OBJECTIVE

For the past few years, the Leroy Greene Academy has been improving its business pathway by hiring and training new staff and changing its curriculum to an entrepreneurship focus. I have been pleased to be part of this process. I plan to continue work in this area through observation, coaching, and planing with teachers and administrators.

In addition to pathway development, this proposal is in support of creating an interdisciplinary instructional system focused on innovation skills. This work will involve supporting teachers in all disciplines in identifying, defining, and implementing skills and innovative frameworks like design thinking in content instruction.
